

# MINOLTA VIEW-FINDER CAP (Old Logo – I tipo)

Serial Nr. no  
Minolta Code: unknown

## Characteristics and Functions

This plastic cap can be used with the XE, XD and XG series reflex cameras produced in the 1970s, until 1981 when the Minolta logo was renewed. Some of these SLR bodies have already incorporated the viewfinder dimmer, therefore they do not require the use of this View-Finder Cap which is applied as a slide on the black plastic frame of the viewfinder eyepiece. A through hole with a rectangular section located under the central ridge allows the cap to be placed on the shoulder strap for transport.

Weight 2g. Dimensions: length 27mm. width 17,5mm.; thickness 9mm.
