Inscription on the lens:
Minolta AF Zoom 28-85mm 1:3.5 (22) - 4.5 Ø55mm

This 28-85mm zoom came on the market in 1985 when the Minolta 7000 AF was introduced. The optical system is the same as the 28-85mm Minolta MD zoom presented in 1983. The body of the lens is covered, in the central part, by a rubber band with a thick inclined strip (1st type). Along the same rubber band there is the squared metal selector to insert the "Macro" function for close-up shooting, which allows you to pass beyond the focal length 28, in a field delimited by an incision painted in blue. On the left is the Minolta logo with the "rising sun"; on the right two lines show the indications: "AF Lens" and "28-85". The collimation signal with the ring nut of the camera optics is made up of a red plastic hemisphere.
